

For winter 2014 - spring 2015 I am planning the breeding activity renewal of the old traditional doberman kennel Bobrava, which, with great respect, I had a honor to take over from Mr. Miroslav Repa (Brno, Czech Rep.). My own first "A" litter is planned as linebreeding 3-3 on Angie Alary Cerny poklad (11 years, SchH3, IPO3), daughter of Lars Bobrava (12 years, SchH3, IPO3, ZVV3), several times successful participant in Nationals and World Doberman IPO Champs in the 90's.

This planned litter is all free of today's overused conformation lines, as for example Citone, iz Slavnoi Stai, Pride of Russia and some others are, and therefore the litter is also free of overused contemporary doberman sires.

Litter sire [Ch. Harras Haico Alary Aslar](#) has a classic dry athletic type conformation and was choosed by me not only for his pretty classic and correct look, for motherline on [Lars Bobrava](#), but last but not least also for his excellent drive and will in tracking, very good motivability in obedience, and for his very good drive and fighting spirit in protection. He possesses overall a little harder nature and very good self-confidence, and he is very friendly and pleasant with strangers outdoors. On the other hand, he lives with all my own dogs inside my house, but when in the garden, he is carefully guarding our territory at home. Harras is Champion of Czech Republic and Slovakia in conformation, the best working doberman male of CZ1 doberman club in 2011, participant in Nationals and World Doberman Champs, participant in several all-breed IPO National qualifications, participant in Czech CACIT, and took 2nd place in Czech Dobermann IPO World Champs qualification.

Litter dam [Krystal Kasey Alary Aslar](#) is very high-drive female in obedience and protection, she is tireless and passionate apporter and in particular she is an excellent, hard and uncompromising protector with inborn hard and firm grip, while she remains very well controllable (her SPr1 was 100 points, IPO3 protection 98 points etc...). Female is currently prepared for her carreer in sport and IPO competitions, hopefully... in common life she is very uncomplicated, friendly or neutral with strangers, she is the female leader of our pack :)

Expected date of mating is November-December 2014, scheduled birth of the puppies will be

---

in January-February 2015 with takeover in March-April 2015. Both parents are health tested, both of them have German ZTP with "A" note for character . Videos of their ZTP can be seen on this webpage, Krystal Kasey [here](#) and Harras Haico [here](#) . The pedigree of planned litter is [here](#) , contact for preliminary interested persons is [here](#) .

For seriously interested persons, there is of course a possibility to see both parents in work (tracking, obedience, protection) as well as in ordinary life - the date of visit can be arranged after mutual agreement. With regard to the temperament, talent and personalities of both parents, I am expecting a litter suitable for sport, and naturally the puppies could be also "only" dear beloved companions, especially for free time activities for actively founded, sporting people.
